Description

APC's Back-UPS 1400 protect your electronic equipment from damage due to power outages, surges and spikes while providing short term battery power during an outage. The Back-UPS 1400 features Automatic Voltage Regulation (AVR), which instantly adjusts high and low voltage fluctuations to safe levels for your electronics, saving battery power for when you need it most during storms and power outages. Additionally, Australian sockets make for easy-to-use connection of protected equipment. Specifically designed to protect your PC equipment and network connection in harsh power environments, the Back-UPS 1400 ensures maximum productivity and work efficiency.
