Description

ROG Z11 is a premium Mini-ITX/DTX case with a sleek and stylish look that rises above the competition by empowering users to showcase compact builds without compromise. Each feature has been designed conscientiously with the user in mind to maximize utility, flexibility and connectivity.

The patented 11° tilt design provides optimized airflow and heat dissipation to create an innovative solution that maximizes thermal performance with demanding hardware - such as an ATX power supply or a 3-slot graphics card without a riser cable. For fans of water cooling, Z11 offers ample space and the option of a custom liquid cooling loop. Adding style to substance, internal build components are beautifully illuminated by Aura Sync lighting that can be seen through the front and right-side tempered glass panels.
