Marketing

Intelligent Sonic technology with micro-vibrations reads your face and adapts to the density of your beard. The personalization buttons make it easy to choose your favorite shaving mode, from sensitive to turbo mode. Twin foils and an integrated middle trimmer shave progressively closer. The amazing adaptability of the shaver head beats even problematic contours. 40° pivoting shaver head effortlessly navigates along larger contours for maximum skin contact. Individual suspension of all cutting elements responds even to small contours.
