Description

All of Brother's computer connectable label printers are supplied with advanced label-printing software in the box as standard. In addition to this software, there are other professional solutions available for download, or from your local Brother office.

Add the benefits of P-touch label printing directly from within your own existing software, or create your own totally customized labeling applications. By using the b-PAC SDK (Software Development Kit), your labels can contain any combination of text, barcodes, images and logos.
