### Description

TZ labels are easily the best home labels you can buy. They're covered by a laminated film - which only Brother has. It's this unique lamination that makes them the most durable, so they're going to stay on longer and allow you to label more things. There're also the most hygienic labels on the market. Indoors you've got all the obvious uses in the kitchen, like labels for ingredients containers, spices and herbs. Brother Labels are also tough enough to go in the freezer - so label containers with precooked meals and leftovers.

They withstand extreme heat too. So you can put labelled container or cups, in the dishwasher, oven or microwave. These labels can withstand minus 80° (a home freezer only gets to minus 17°), and 150°+, so you will get a lot more wear and tear out of Brother Labels. The labels can withstand wind, rain and sun where other labels would buckle. So you can label items outside - like identifying plants in the garden or your letterbox. The labels are chemical resistant and won't fall apart or fade if you do spill liquid on them - so label recycled chemical bottles in the garden shed.
