## Description

LUCIA PRO ink adopts capsulated pigment particles and a Chroma Optimizer coat. With this evolution, ink can be placed more densely and it brings higher color gamut by increasing the number of color droplets on the paper. This dense ink-configuration also brings gloss uniformity on coated media for better glossiness and image clarity that achieves anti-bronzing.

## Main features

|                     |                                                 |
|---------------------|-------------------------------------------------|
