Description

The powerful Robotic Lawnmower for small lawns

A quiet, versatile and intelligent little garden helper—that's the GARDENA Robotic Lawnmower SILENO minimo 250 m². The SILENO minimo is ideal for small lawns, combining high performance and precision with convenient mowing. Let's get started! Pick up your smart phone and use the GARDENA Bluetooth® App to enter the lawn size, desired mowing days, and preferred start time. The GARDENA Bluetooth® App guides you intuitively through the initial installation, step by step. Your Robotic Lawnmower organises a schedule and is ready to go with zero fuss. It's simple to conveniently control your SILENO minimo via Bluetooth® from up to 10 m away. Your mowing robot works out the optimum grass cutting time and the GARDENA Bluetooth® App uses its scheduling assistant to help you keep your garden just right. This mower has best in class low noise levels at only 57db(A) thanks to a particularly quiet motor. You and your neighbours can relax in peace in the garden, even when your robot is in action. The sophisticated CorridorCut guides the robot mower while it's cutting in narrow spaces and tight corners of just 60 centimetres in width. CorridorCut will even agilely navigate your robot mower out of tricky dead ends. Guided by SensorControl, the robot judges for itself how often your lawn needs a trim, setting off at precisely the right frequency according to grass growth. Your clever little helper will cut the grass as efficiently as possible. An intrepid Auto Weather and Terrain hard worker, the SILENO minimo mows the lawn independently, whatever the weather, rain or shine. The clever Robotic Lawnmower notices if the ground is frozen or too frosty and the robot waits until it has thawed by pausing its programme. The boundary wire indicates to the SILENO minimo the area of garden that needs to be mown. Similarly, the guide wire directs the robotic mower reliably and fully automatically around all mowing areas. Your lawnmower will have no problems squeezing through narrow spaces and even scaling slopes or inclines of up to 25 percent. Once the job is done the hard-working robo-gardener makes its way back home to the charging station for a well-earned recharge. It mows completely autonomously, giving you more time to focus on doing the things you love in the garden. The SILENO minimo can be cleaned easily with a garden hose, it couldn't be simpler. Enjoy your

time in the garden with SILENO minimo, just sit back, relax and let the little robotic mower do the hard work for you. Your lawn will always look wonderfully well-manicured with SILENO minimo: THE intelligent robotic lawnmower. SILENO.

Bluetooth® Connection

Simply pick up your smartphone and easily set up your SILENO minimo with the GARDENA Bluetooth® App from up to 10 m. Benefits include EasyApp Control, Auto Schedule and EasyConfig for easy installation and use with zero fuss.

Pro-silent

Relax in your garden while SILENO minimo quietly gets to work. The best in class low noise level (57db A) won't disturb you at all.

AI-precise

This lawnmower is an expert navigator, tackling the narrowest spaces and tightest corners with reliable precision.

Auto Weather & Terrain

SILENO minimo is an expert garden helper, getting to work in all weather, come rain or shine. This lawnmower cuts all shapes of lawns from simple to complex layouts, including slopes of up to 25 percent.

Ideal for small and complex lawn areas

The GARDENA SILENO minimo mows small and complex lawn areas completely automatically, reliably and evenly. It manages narrow spaces and tight corners without a problem. The charging station can also be set up flexibly with no hassle.

Very cool

The innovative frost sensor detects temperatures close to freezing point and pauses the mowing plan to protect your lawn. You can switch it on or off using the GARDENA Bluetooth® App too.

Safe and sound

The boundary wire determines the mowing area flexibly and reliably - ensuring the Robotic Lawnmower only mows the areas specified. Highly responsive collision sensors make sure the mower operates safely with no accidents or damage to your garden. When the tool is lifted, another set of sensors make the blades stop immediately, thus preventing injuries.

Easy cleaning

The GARDENA SILENO minimo has been constructed so that simple spray down with a garden hose thoroughly cleans housing, blades and wheels of dirt, dust and grass clippings.

Spot Cutting: You spin me right round!

The spot cutting feature, a spiral mowing function, makes the SILENO minimo ideal for hard-to-reach areas such as under trampolines or garden furniture—doing the hard work for you!

Main features

General

Type	Robotic lawn mower
Maximum lawn area	250 m ²
Cutting width	16 cm
