Solar-Bewässerungs AquaBloom Set

Group	Irrigation Equipment
Manufacturer	Gardena
Manufacturer item no.	13300-20
EAN/UPC	4078500049481

Description

Plant care for when you're not there. With Gardena AquaBloom your balcony and tub plants are in good hands - all season long. AquaBloom waters and takes care of your plants even in times when you're not around. The helpful system requires neither a water tap nor a power supply in your garden or terrace. With just an additional water bucket you'll be ready to go. The AquaBloom set is a complete ready-to-use irrigation system consisting of a 3-in-1-main unit. It combines a pump to draw water, a control unit to define the irrigation schedule and a solar panel that feeds the included rechargeable batteries. The 14 pre-defined watering programs let you still be in control of the watering of up to 20 plants with the help of pressure-compensation drippers. Each dripper can cater up to 300 ml. Don't forget to make use of the very convenient and flexible placement of the AquaBloom. Choose a sunny place for the control unit: hang it on a flowerpot, place it on a table or fix it on a wall. The installation of AquaBloom is simple and tool-free! Get rid of time-consuming irrigation tasks and enjoy your balcony and terrace with beautiful and well-cared plants and flowers all season long - no matter how long you are on holiday or on business trips.
