

## Gardena RollUp L - Hose box with hose

30 m

Group	Irrigation Equipment
Manufacturer	Gardena
Manufacturer item no.	18627-20
EAN/UPC	4078500052054

### Description

Watering that's always ready for action! The Wall-Mounted Hose Box RollUp L is no ordinary hose storage, it makes easier for you to use your garden hose when watering your plants. The hose box is simply mounted on your house wall with a wall bracket and connected to the water tap with a connecting hose. Watering your large garden has never been so convenient and flexible. Thanks to the 180° swivel box and the 30-meter-long garden hose, maximum freedom of movement is ensured when watering. For use, simply pull out the garden hose to the desired length and start watering. As soon as you stop, the extra short locking points grip and secure the garden hose. After work is done, you don't have the hassle of winding in, bending over and wet hands when rolling up the hose. With just a light pull on the end of the hose, you release the lock and activate the built-in steel spring. This automatically, reliably and evenly rewinds the hose for you. The innovative RollControl technology ensures safe and controlled retraction, while the integrated hose guide ensures neat, even winding. You always have your Gardena hose nozzle and water accessories ready to hand, as they can be attached underneath the wall bracket and stored there to save space. The Wall-Mounted Hose Box RollUp L is made of high-quality materials with both UV and frost protection. This means it can withstand various weather conditions and can stay outside on the house wall all year round. In addition to the Wall-Mounted Hose Box you will receive all the necessary connection and assembly parts: a wall bracket, a connecting hose, all the necessary Original Gardena System Parts as well as a hose nozzle with two different spray jet options. What's more, the hose storage is protected with an anti-theft device.

### Main features

Product Description	Gardena RollUp L - hose box with hose
Product Type	Hose box with hose
Package Content	Wall brackets, spray nozzle, connection hose
Frost Protection	Yes
Length	30 m
