Description

Business opportunities are at your fingertips if you're able to take advantage of touch. ThinkVision T24t-20 puts success in both your hands thanks to its touch-screen panel display that recognizes input from 10 points at once. That lets you control different areas of the screen simultaneously. And with touch sensors, you can draw and edit images with precision and work with apps that use variable touch. Its high-resolution, anti-glare, 3-side NearEdgeless screen that can operate even without a stand makes it ideal for transforming public-facing scenarios and home working moments into literal touch points. With multiple options for connectivity, this docking monitor lets you connect to desktops, laptops. T24t-20 lets you use that touch input to control them when they're connected, giving you the intuitive mastery of your IT arsenal. It's made possible by the USB Type-C port that provides a true 1-cable solution, removing additional cables and complex setups, to enable touch. That single cable transfers both data and video signals and can even power your connected devices through Lenovo Smart Power management without extra power cables clogging up your workspace.
