UPHOLSTERED WITH ALCANTARA®

Superior Comfort and Durability

Its unique dual-textured finish achieves the right mix of comfort and durability—featuring plush, soft touch Alcantara material on the backrest and seat base for a premium feel, and outer edges lined with smooth sustainable leatherette to better withstand daily wear and tear.

DESIGNED FOR ALL-DAY COMFORT

Specialized Shoulder Arches and Wide Seat Base

Through a combination of its unique 110° extended shoulder arches and 21" ultrawide seat base, the Razer Enki Pro gaming chair ensures optimal weight distribution for long-lasting comfort during gaming marathons.

BUILT-IN LUMBAR ARCH

Support and Maintain the Right Posture

The Razer Enki Pro's lumbar curve gently supports your lower back and encourages you to sit in a neutral position, allowing you to maintain the right posture and your back to feel less fatigued when sitting for long periods.

DUAL-DENSITY CUSHIONED BACKREST

Targeted Back Comfort

While the Razer Enki Pro features a softer seat base just like the rest of the range, the cushioning in its backrest is refined for targeted back comfort. Firmer along the edges but softer in the center to cradle your back, it offers the perfect combination of support and comfort.

REACTIVE SEAT TILT

AND UP TO 152° RECLINE

Weight-adjusted Tilting and Flexible Seat Positioning

The gaming chair's mechanism allows for intuitive, weight-adjusted tilting so you can lean back and stay supported without having to make manual adjustments. Alternatively, an easy-access dial allows you to attain precise angle of recline you desire for flexible seat positioning.

MAGNETIC MEMORY FOAM HEAD CUSHION

Truly Seamless Head and Neck Support

For truly seamless head and neck support, the magnetic head cushion is easily adjustable yet secure enough to avoid shifting during use, while its curved shape and soft foam offers the ideal mix of comfort and support.
