Description

Featuring high-static pressure design, exceptional cooling performance and ultra-silent operation, the patented circular 256 multicolored 140 mm RGB fan utilized PWM fan, concentrated compression blade, hydraulic bearings, wind blocker frame and anti-vibration mounting system. Moreover, the built-in LED ring can maintain color and brightness uniformity. The lighting is visible from all sides and angles.

A self-contained fan controller can switch between 5 LED modes including solid colors of red, blue, white, green or disable and cycle through 256 colors. Play/Pause functions allow users to cycle colors (color remains unchanged even after the PC has been turned off or rebooted) with speed control options reduce noise even more all from your fingertips.
