## Description

TP-Link TL-POE160S V2 - PoE injector - gigabit - AC 100-240 V - 30 Watt - output connectors: 1

## Main features

|                           |                                                          |
|---------------------------|----------------------------------------------------------|
| Product Description       | TP-Link TL-POE160S V2 - PoE injector - gigabit - 30 Watt |
| Device Type               | PoE injector - external                                  |
| Power Over Ethernet (PoE) | PoE+                                                     |
| Input Voltage             | AC 100-240 V                                             |
| Power Capacity            | 30 Watt                                                  |
| Output connectors         | 1 x RJ-45 30 W                                           |
| Included Accessories      | Wall mounting kit                                        |
| Dimensions (WxDxH)        | 12.5 cm x 5.94 cm x 3.68 cm                              |
